

Accurate
Easy to Use
Smart

Radius Track Corporation's **Curved-Right**[®] **ICF Applications** offer a geometrically accurate solution for your curved ICF project. Built to perfection, our pre-curved framing elements give you control of the geometry for foundations, domes, arched and curved openings. Our team of CFS framing experts will design curved framing elements to project specifications, oversee their fabrication and have them delivered with detailed drawings to your job site.

ACCURATE

- Our patented bending method produces consistent precise curves.
- Components fabricated off site in a controlled environment.
- Pre-curved framing to set and control geometry.
- Geometrically precise track adds rigidity and precision to ICF coursing.

EASY TO USE

- Connects easily to ICF products with standard fasteners.
- Integrates easily with wood bucks at openings.
- Components clearly labeled and identified on drawings.
- Simplified formwork for a circular elevator shaft.

SMART

- Coordinated design and fabrication.
- Just-In-Time (JIT) delivery available.
- No cutting or field fabrication required.
- Removes the guesswork from curved or complex pours.
- Complete an online request for quotation.
- Saves you money. Very smart.
