

THE ART AND SCIENCE OF SIMPLIFYING THE CURVE

To Whom It May Concern:

RE: Radius Track Corporation Curved-Right® Steel Framing Recycled Content

In reference to LEED® category Material and Resources – Credits 4.1 and 4.2 Recycled Content, Radius Track Corporation's Curved-Right® custom curved steel framing products are manufactured from steel coil containing 36.9% post-consumer recycled content and 16.7% post-industrial/pre-consumer recycled content.

These calculations are based upon information provided by the Steel Recycling Institute. The methods for calculating the recycled content of steel produced by basic oxygen furnace and electric arc furnace were applied to our provider's steel purchasing patterns.

When submitting this letter per LEED® requirements, it is your responsibility to verify that substitutions are not made and that Radius Track Corporation products are supplied. Should you require additional information, please contact us.
