

Framing Solutions for Curved & Complex Surfaces

Radius Track Design Assist delivers the confidence you need to execute curved & complex surfaces. And you'll have the flexibility to select the cladding material, installation team and other specifics critical to ensuring your project delivers in every way.

Our role is to facilitate what you create. We strive to provide exactly the right expertise exactly when and how your team needs it. Our design team comprised of architects and contractors is passionate about setting a project on the right course so that the framing design supports the architect's vision and delivers a cost-effective constructable solution.

Three Design Assist service levels deliver the right framing direction at any phase of a project. Each service level anticipates potential project-wide fabrication and construction issues before they place a project at risk.

Complex Project? We Do Complex.

DESIGN ASSIST SERVICE LEVELS

- Complimentary: Provide high level constructability direction. FREE-OF-CHARGE COLLABORATION
Proof of Concept: Develop rules and parameters for focus areas
Fully Engineered Solution: Resolve complex framing conditions for full project scope. ALL-INCLUSIVE DEEP ENGAGEMENT

The initial phase of our engagement is always free of charge. SCHEDULE a complimentary consultation.

Bridge the gap from complexity to constructability.

Beyond Design Assist services, Radius Track custom fabricates framing components to provide fully engineered framing solutions compatible with the customer's choice of cladding material for interior surfaces and exterior envelopes. The Radius Track Design Assist + Precision Fabrication process ensures the accurate translation of your ideas - from design through material delivery.

Radius Track is passionate about serving our customers well. Our vast experience with curved and complex surfaces assures that we anticipate potential fabrication and construction issues before they place a project at risk. And we support the project to the finish by delivering concise installation instructions and, most importantly, staying with customers until the job is done.
